REB #17-748

Have you ever wondered how much kids use technology?

What is this study about?

Researchers at Holland Bloorview Kids Rehabilitation Hospital are doing a study to understand how children with and without ASD use technology.

Who can participate?

We are looking for:

- Youth with and without autism, between the ages of 13 and 19 years.
- Parents who have children 19 years of age or younger;
- Access to internet to complete survey.

What's involved?

For this study we will ask you to complete a short online survey with 44 questions. This usually takes about 10 – 15 minutes. The survey is anonymous - We will NOT ask you to tell us your name or anything else that may identify you.

What are the risks and benefits?

We don't think there are any risks to the study, but by helping us with this survey, it can help us better understand how children and youth with ASD use technology.

How do I participate?

If you are interested and meet the requirements, please visit [<link to survey>](#).
