

# Expand access & impact: Project SEARCH Ontario

## Project SEARCH<sup>1</sup>:

- Provides **comprehensive workforce development training for students with disabilities** and special education needs to transition directly from their final year of high school to work.
- Consistently achieves **70%+ employment rates** of graduates in **complex, systematic roles paying above minimum wage**. This is more than 2.5x higher than Canada's reported 26-30% employment rate of individuals with severe disabilities.
- Grew from 2 sites (2019/20) to **19 sites** in Ontario in 2024/25. Interest continues to grow **but communities struggle to start and sustain this effective program**.
- Achieves its **unique results** with transition best practice components and by **braiding funding and expertise from education, employment and developmental disability sectors**.
  - Students immerse at a host business for hands-on work experiences enhanced by explicit teaching of work life skills.
  - Each cohort of 10 students is guided by 1 teacher (education partner) and 2 skills trainers (employment support partner).
- Faces a **sustainability and access crisis** - because **employment support organizations lack funding for the vital skills trainer role**. Cost per student estimated at \$16,000. Employment organizations are withdrawing support and sites may close or underperform.
- Could boost economic inclusion, address labour shortages<sup>2</sup> and **deliver strong cost-benefit**<sup>3</sup>.

- Graduates have the technical and employability skills needed to be part of Ontario's labour force.
- For every graduate that achieves the typical outcome of a job \$1-2 above minimum wage within 6-9 months of graduation:
  - Individual benefits from economic and social inclusion.
  - Lifetime cost savings to government is estimated at ~ \$127,000.
- With 27 sites and 189 students projected for 2025/26, if government enables funding for skills trainers the anticipated net lifetime cost savings is \$13.6 million. (Detail next page)

## Funding options:

- 1 Make 1-year increased DSO Passport allocation to students accepted to Project SEARCH.
- 2 Prioritize accepted Project SEARCH students from waitlist for DSO employment support funding and flow funding to employment service/developmental disability support provider during Project SEARCH training year.
- 3 Other option for adjusting applicable funding parameters

## Detail - cost benefit projections:

	Reference year 2024/25 (actuals)	2025/26 (projections)	2026/27 (projections)	2027/28 (projections)	2028/29 (projections)	2029/30 (projections)	Total funding required (5 years)
# sites (growth to 25/26 actual, projected up to 4 new sites/year)	19	27	31	35	39	43	
# students (projections based on 2024/25 median=7)	125	189	217	245	273	301	
Estimated costs for 1/2 sites requiring 1 skills trainer for cohort size 6 students or less (\$80,000)	n/a	\$1,080,000	\$1,240,000	\$1,400,000	\$1,560,000	\$1,720,000	
Estimated costs for 1/2 sites requiring 2 skills trainers for cohort of 7-10 students (\$160,000)	n/a	\$2,160,000	\$2,480,000	\$2,800,000	\$3,120,000	\$3,440,000	
<b>Total cost/year</b>	n/a	\$3,240,000	\$3,720,000	\$4,200,000	\$4,680,000	\$5,160,000	\$21,000,000
Projected lifetime government cost savings based on 70% graduates obtaining expected employment outcomes and cost benefit analysis <sup>3</sup>	\$11,142,075	\$16,846,817	\$19,342,642	\$21,838,467	\$24,334,292	\$26,830,117	\$109,192,335
<b>Net benefit (cost savings)</b>		<b>\$13,606,817</b>	<b>\$15,622,642</b>	<b>\$17,638,467</b>	<b>\$19,654,292</b>	<b>\$21,670,117</b>	<b>\$88,192,335</b>
