

HOLLAND BLOORVIEW KIDS REHABILITATION HOSPITAL

Has your child been diagnosed with autism, PDD-NOS or Asperger's syndrome?

Is your child between 10-17 years of age?

We are currently conducting a clinical trial to investigate whether Intranasal Oxytocin helps to improve symptoms of Autism Spectrum Disorder, specifically social functioning and repetitive behaviours.

To learn more about this study please contact Naomi Peleg at Holland Bloorview at 416-425-6220 ext. 3456 or via email to npeleg@hollandbloorview.ca
