

Bloorview Research Institute

Autism Research Centre

Conducting innovative research programs aimed at improving outcomes and quality of life for children with autism spectrum disorders

Is your child, 21 years or younger, and have a **Neurodevelopmental disorder** (e.g., ASD, Intellectual Disability, Rett Syndrome, Fragile X, Down Syndrome, Anxiety Disorder or any genetic mutation with a developmental phenotype)?

Or is your child **typically developing** and between the ages of 3 – 21 years?
We are currently conducting new research studies across Ontario to understand how genes and biology affect the brain and behaviour in Neurodevelopmental Disorders.

We need your help!

POND-Network: Province of Ontario Neurodevelopmental Disorders-Network

Participation may include:

- Activities, Interviews, & Questionnaires
- A blood sample for genetics analysis
- A brain scan (you can get pictures of your brain!)
- A medication trial to find new ways to help children who have ASD

POND NETWORK
