

Baby CIMT Clinic

Referral to Baby CIMT:

Online referral can be accessed by clicking **here**. Indicate Baby CIMT on the referral and identify the community service(s) involved including name of the clinician(s).

Referral criteria:

- The infant lives in Toronto or Greater Toronto Area.
- The infant is between the ages of 4-21 months.
- The infant has asymmetrical hand use, has a diagnosis of, or is identified to be at risk of, hemiplegic cerebral palsy.
- The infant is involved with community services (i.e. OT, PT, EI).

Clinic consultation & support for Baby CIMT

About the Baby CIMT Clinic:

The clinic provides assessment to infants who are at risk of, or who have a diagnosis of hemiplegic cerebral palsy. Clinicians will receive consultation and support for implementation of Baby CIMT. The clinic provides no active therapy.
