Are you a Canadian youth or young adult on the autism spectrum?

Consider participating in a study to help design and provide feedback on a workplace disclosure decision-aid guide and planning tool.

What is this study about?

We are looking for feedback on a prototype (early draft) of an online workplace disclosure decision-aid guide and planning tool. We want to know whether you found the tool useful, easy to use, liked or disliked it, and if anything needs to be added, changed, and/or removed.

Who can participate?

We are looking for:

- Autistic youth and young adults (age 15-29)
- Is looking for paid work or has work experience
- Able to access internet and a tech device
- Able to communicate in English
- Lives in Canada

What's involved?

- Reviewing the tool
- Participating in one interactive online session (using Zoom and Slido) to answer questions and provide feedback on the tool (~2 hours) with other youth and young adults on the autism spectrum.

Potential Benefits?

- Help us learn about how we can make the tool better and more useful for Canadian youth and young adults on the autism spectrum.

Potential Risks?

- No serious identified risks to participating.

Participants will receive an e-gift-card to thank them for their time and volunteer hours (if applicable).
