	<p>Constructing the (m)other : narratives of disability, motherhood, and the politics of normal</p> <p>Summary Constructing the (M)other is a collection of personal narratives about motherhood in the context of a society in which disability holds a stigmatized position. From multiple vantage points, these autoethnographies reveal how ableist beliefs about disability are institutionally upheld and reified. Collectively, they seek to call attention to a patriarchal surveillance of mothering, challenge the trope of the good mother, and dismantle the constructed hierarchy of acceptable children. The stories contained in this volume are counter-narratives of resistance - they are the devices through which mothers push back. Rejecting notions of the otherness of their children, in these essays, mothers negotiate their identities and claim access to the category of normative motherhood. Readers are likely to experience dissonance, have their assumptions about disability challenged, and find their parameters of normalcy transformed.</p> <p>Lalvani, Priya, editor. 	<p>Born extraordinary : empowering children with differences and disabilities</p> <p>Summary Born Extraordinary helps parents of children with differences and disabilities to relinquish their instinctive anxieties, embrace their new normal, and ultimately find joy in watching their children thrive. Often the subjects of unwanted attention-ranging from pitying stares to bullying-Zucker and her sons have learned to ignore what others think and live fearlessly. Also incorporating the stories of other families with visible and invisible differences of all kinds, Born Extraordinary gives parents the tools to meet their children's emotional needs while supporting the whole family unit. Parents learn how best to empower their children to confront others' assumptions, grow in confidence, and encourage dialogue-rather than silence, fear, and shame-around difference</p> <p>Zucker, Meg, author. 	<p>Being seen : one deafblind woman's fight to end ableism</p> <p>Summary With partial vision in one eye and bilateral hearing aids, Sjunneson lives at the crossroads of blindness and sight, hearing and deafness. While she cannot see well enough to operate without a guide dog or cane, she can see enough to know when someone is reacting to the visible signs of her blindness and can hear when they're whispering behind her back. As a media studies professor, she has also seen the full range of blind and deaf portrayals on film. Here she deconstructs their impact, following common tropes through horror, romance, and everything in between. In doing so, she explores how our cultural concept of disability is more myth than fact-- and the damage it does</p>	<p>HV1596.2 .S58</p>

	<p>Normal : one kid's extraordinary journey</p> <p>Summary Normal. Who is to say what this word means? For Magda Newman, it was a goal. She wanted her son Nathaniel to be able to play on the playground, swim at the beach, enjoy the moments his friends took for granted. But Nathaniel's severe Treacher Collins syndrome -- a craniofacial condition -- meant that other concerns came first. Could he eat without the aid of a gastrointestinal tube? Could he hear? Would he ever be able to breathe effortlessly? But Nathaniel looks at 'normal' from a completely different perspective. In this uplifting and humorous memoir that includes black-and-white comic illustrations, mother and son tell the story of his growing up -- from facing sixty-seven surgeries before the age of fifteen, to making friends, moving across the country, and persevering through hardships. How they tackle extraordinary circumstances with love and resilience is a true testament to Magda and Nathaniel's family, and to families everywhere who quietly but courageously persist.</p> <p>Newman, Magdalena, author.; Newman, Nathaniel,</p>	<p>PZ7 .N48</p>

	<p>Challenging behavior</p> <p>Summary Over the past four decades we have learned much about the nature of challenging behaviours and developed approaches to support and intervention that have been shown to be effective, for some people, in bringing about rapid and socially significant reductions in challenging behaviour. The primary aim of this book is to provide a concise overview of this body of knowledge. This is not, however, a 'how-to-do-it' book. Instead, it will focus on describing developments in knowledge that have important implications for practice. A range of alternative texts are available for those seeking detailed instructions for carrying out intervention programs</p> <p>Emerson, Eric, Einfeld, Stewart L. 	<p>A life beyond reason : a father's memoir</p> <p>Summary Before becoming a father, Chris Gabbard was a fast-track academic finishing his doctoral dissertation at Stanford. A disciple of Enlightenment thinkers, he was a devotee of reason, believed in the reliability of science, and lived by the dictum that an unexamined life is not worth living. That is, until his son August was born. Despite his faith that modern medicine would not fail him, August was born with a severe traumatic brain injury as a likely result of medical error and lived as a spastic quadriplegic who was cortically blind, profoundly cognitively impaired, and nonverbal. While Gabbard tried to uncover what went wrong during the birth and adjusted to his new role raising a child with multiple disabilities, he began to rethink his commitment to Enlightenment thinkers—who would have concluded that his son was doomed to a life of suffering. But August was a happy child who brought joy to just about everyone he met in his 14 years of life—and opened up Gabbard's capacity to love. Ultimately, he comes to understand that his son is undeniably a person deserving of life. A Life Beyond Reason will challenge readers to reexamine their beliefs about who is deserving of humanity.</p> <p>Gabbard, Chris, author.
