Welcome to Holland Bloorview's Psychopharmacology Clinic

What is the Psychopharmacology Clinic?

The Psychopharmacology Clinic is a service for clients whose complex medical and developmental differences require the need for medication management as part of their overall treatment plan.

This clinic is situated at Holland Bloorview Kids Rehabilitation Hospital. We use a team approach to deliver co-ordinated services for children and families.

My child's referral has been accepted... What's next?

Our scheduling team will give you a call to book an appointment with our team.

You will then be contacted by the clinic nurse to discuss whether your child is currently on any medications and to review other relevant information.

The nurse will ask you to bring any documentation you may have to ensure optimal care for your child.

What is the Psychopharmacology Clinic Process?

Our aim is to support your transition back to your primary care provider.

The process consists of the following steps:

Initial visit with interdisciplinary team for assessment/ goals/ care planning.

Follow up visits as planned with the interdisciplinary team.

Transition planning with possible referral to Transition Clinic to help families prepare for discharge to their community healthcare provider.
